

# Marchelle wants you to know . . .

If you need  
Medicare coverage,  
do NOT subscribe to  
an Advantage plan!

Diagnosed with a rare condition 14 years ago, Marchelle took out a Medicare Advantage plan upon turning 62, based on advice from her insurance agent. Her new plan denied and delayed her Chemotherapy treatments, greatly costing her and her family in deductibles, co-pays, and out-of-pocket expenses --- not to mention her health and peace-of-mind.

At age 65, Marchelle switched to traditional government Medicare and a reliable supplement policy. The difference was night and day, as she no longer has to worry about being able to afford her treatments and medical care.

Marchelle is adamant:

"I want to help educate the Medicare population  
about Advantage plans!  
They are NOT as advertised."
